

# Infrastructure and telecom operator

AFR-IX telecom is an infrastructure and licensed telecommunication operator that delivers **Data, MPLS, SDN and advanced Managed solutions to Corporates, International Carriers and local Telecom Operators in Africa:**

AFR-IX telecom holds licenses in **Spain** (CNMC electronic and submarine), **Portugal, USA, South Africa, Nigeria, DRC, Mali, Burkina Faso, Sierra Leone, Cameroun, Niger, Mauritania and Kenya.**

## Services

### IP TRANSIT

Access to the Internet using Full BGP Routing with a non-oversubscribed, high-speed, low-latency and protected against DDoS attacks.

### IPLC

Allows your company to connect with your clients' African sites with a point-to-point private line.

### L2 & L3

Connect your African sites through the AFR-IX MPLS Network with a wide variety of solutions according to your needs. Our infrastructure provides a Cisco backbone.

### DIA

Access to the Internet with a non-oversubscribed, high-speed, low-latency and fewer-hops connection for your African sites.

### MANAGED SERVICES & COLOCATION

We provide fully managed services to African operators and global companies. We also offer hosting and housing services in the main African cities.

### DDOSSHIELD

Protect your Client's network from Volumetric DDoS attacks: attacks focused on causing congestion by sending so much traffic that it overwhelms the band width of the site.

### SD-WAN

The SD-WAN Service provides the logical construction of a L3 Virtual Private Network that... Operates over one or more undelay connectivity services: Ethernet, IP, L1,...

### FOR CONTENT PROVIDERS AND CDN

### BACKBONE & DATA CENTER SERVICES

We offer to Content Providers & CDN the required infrastructure to create a CDN with more than 120 POPs strategically placed, geographically distributed, and connected via private backbone through out Africa.

*I'm very happy for the provision and Commercial and Operational management of our Direct Internet Access Service. It was done for our subsidiaries in 7 countries in West Africa.*

Security & Network Manager at Equatorial Coca-Cola Bottling Company (ECCBC) part of Coca-Cola Group for Africa.

# Advantages

Our clients are our partners from the first minute. We satisfy clients from many segment: Tier 1 carriers, local companies or corporates.

Our field engineers are dedicated to assisting and developing network solutions on the ground. They actively hire local engineers CCNP certified.

Security, privacy, redundancy and fast connectivity are all guaranteed by our network of experts and local partners.

Our client well being is measured by the SLA (Service Level Agreement), achieving a high level of satisfaction in every action we perform.

Local presence providing global Managed Services options and solutions.

Monitoring tools personalized for each client. And 24x7x365 customer support service.

## The largest pan-African network

AFR-IX telecom provides reliable and resilient connectivity in West and Central Africa through countries connected by submarine cables.

Our PoPs in Europe, America and Africa allow us to provide quality services to a growing market.

AFR-IX owns a metro-Ethernet network with MPLS for African IT infrastructure by bridging fiber networks with MPLS capabilities.
